

4-LINK FORCE™

ABOUT THE 4-LINK FORCE

Schaffert Manufacturing Co. Inc. and Graham Electric Planter partnered to introduce the **new 4-Link Force™**. This is an active furrow closing system, utilizing our patented 4-Link Closer™ tail section with Graham's patented wireless Samsung control solutions.

Schaffert Mfg. has taken the nine-inch travel of the 4-Link Closer and added the Graham 12-volt actuator that provides 125 pounds of closing force. Adding in a 1000 pounds load cell, and a torsional dampener makes the 4-Link Closer even smoother running!

With the Graham Command Pro™, active management system, we can set the entire planter closing system from the cab and watch individual row performance on the wireless tablet.

Unlike other systems the 4-Link Force™ has no air lines or hydraulic hoses going to the rows. The 4-Link Force™ offers automatic down force management on the closing wheels through a prescription map or settings through the tablet in your cab.

Add the G-series 2x2 fertilizer system to the 4-Link system and place your fertilizer behind the planter, eliminating mess on the planter.

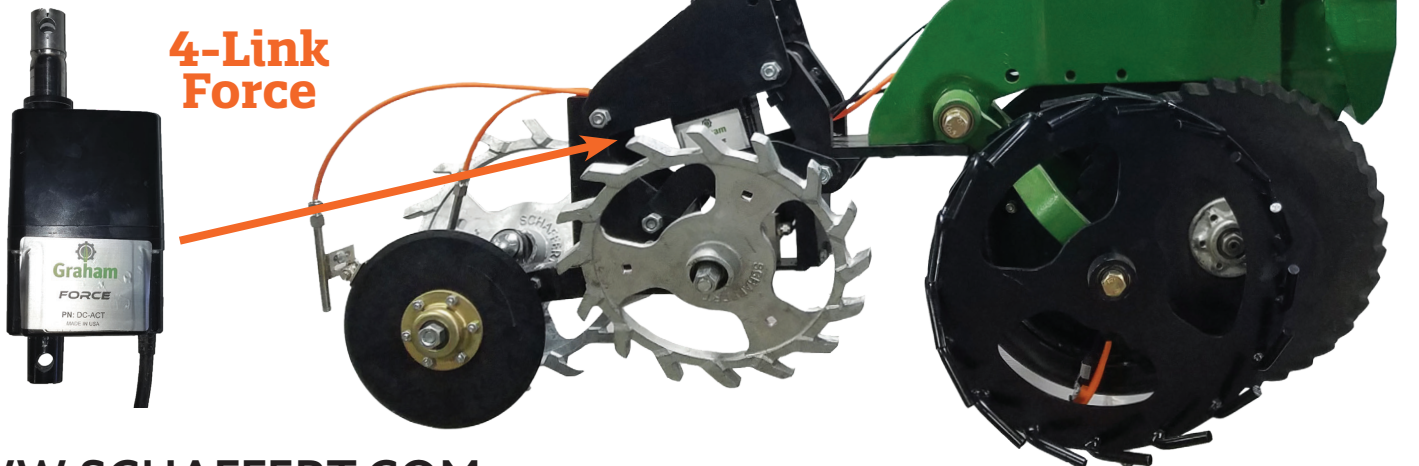

The 4-Link Force™ adapts to fit most OEM planters today.

BENEFITS OF THE 4-LINK FORCE

- ▶ **4-Link Graham Force™** gives planters a second parallel linkage with *in-cab fast reacting wireless down pressure*.
- ▶ The 4-Link Graham Force gives you 9" of parallel travel using Graham 12 volt actuator for 125 pounds of down pressure.
- ▶ Added feature-optional fertilizer placement.
- ▶ Graham wireless eliminates air & hydraulic hoses.
- ▶ Better *seed-to-soil* contact & closure.
- ▶ 4-Link™ takes bounce out of planter.

Add Mohawk™
and Zipper™
Wheels
